

# FIRE CONTROL COMPUTER

Artillery fire control system (AFCS) supports ballistic computation for different calibers (including 155 mm). Rugged hand-held computer model Algiz 10x is used for application software for FCS.

## MAIN TECHNICAL DATA:

- CPU: Intel quad core 1.83 GHz
- Main memory: 4GB DDR3 RAM
- Hard disk: 120GB SSD
- OS: Windows 10 Enterprise
- Screen: 10.1" (16:10)
- Battery: Hot swappable battery pack: standard battery 5300 mAh, extended 10600 mAh
- Navigation: Integrated GPS & GLONASS
- Interface: 1 x USB 2.0, 1 x USB 3.0, 1 x 9-pin serial RS232 port, 1 x VGA, 1 x DC power port, 1 x RJ45 LAN
- Docking station
- Operating temperature: -20°C to +60°C
- Storage temperature: -40°C to +70°C
