

ABOUT US

Yugoimport-SDPR is a state-owned company with a decades-long tradition in the trade of armaments, defense equipment and technology transfer, providing G to G concept to its partners all over the world.

In its seventy-five year long existence, **Yugoimport-SDPR** has proven to be a reliable partner offering a long-lasting after-sales support to its buyers, including training in operation and maintenance, supply of spare parts, upgrade programs etc.

Known globally as an arms dealer, **Yugoimport-SDPR** has innovated its business policy with an ambition to position itself in the future as a manufacturer of complex weapon systems and defense equipment.

Quality policy is an integral part of **Yugoimport-SDPR's** business policy, representing a management tool for achieving well-defined business objectives. For many years now, **Yugoimport-SDPR** has maintained the globally recognized proof of quality, the ISO 9001 Certificate, demonstrating its compliance with the highest standards, and ensuring continued business excellence.

NORA B52 – Self-propelled gun-howitzer 155 mm

LAZAR – Multirole armoured vehicle 8x8

MISSIONS

- Serbian defense industry integrator on the global market of armaments and defense equipment,
- Developing and organizing the production of complex combat systems,
- Supplying the Ministry of Defense and the Ministry of Interior of the Republic of Serbia with in-house or imported complex combat systems and other materiel.

We make a notable difference by customizing our equipment and coming up with a collaborative conceptual design solution for the product in question.

Hence, our business slogan is:

**OUR VISION.
YOUR DEFENSE.
MUTUAL CHOICE.**

In performing its first business mission of being a marketing and commercial integrator on the global defense market, from the very beginning Yugoimport-SDPR has been intensively and closely cooperating with all companies of the defense industry and producers of armaments and military equipment.

The Company's visibility on the world defense market is best reinforced through participation in the most relevant global and regional defense exhibitions. Using its modern approach, means and presentation aids accompanied with a large budget committed to marketing activities, it represents and promotes the local industry and the entire defense complex of the Republic of Serbia. Besides the fact that this kind of approach has positive effects on the Company and on the country as a whole, this is also beneficial for more than 200 companies registered for trade in defense field, which are thus given the opportunity to sell defense products.

SCOPE OF THE OFFER

LAND FORCES

- Infantry weapons and equipment
- Fire support systems
- Combat and non-combat vehicles
- Land based air-defense systems
- Optic and optoelectronic equipment, radars, multi-sensor battlefield observation systems etc.
- NBC defense
- Engineering equipment
- Quartermaster equipment

AEROSPACE

- Aircrafts
- UAVs
- Aircraft armament
- Aircraft equipment and subsystems
- Aircraft upgrade

NAVY

- Fast multi-role boats
- Naval weapons, optoelectronics and FCS
- Naval equipment

AMMUNITION

- Small arms ammunition
- Medium caliber ammunition
- Grenade launcher ammunition and hand grenades
- Mortar shells
- Artillery ammunition
- Artillery rockets
- Tank ammunition
- Missiles
- Demolition charges, at mines, defensive anti-materiel fragmentation charges and blasting devices
- Fuses
- Primers
- Powders, explosives and pyrotechnics

SERVICES

- Technology transfer
- Defense infrastructure
- Overhaul
- Training and education
- Communication and information security
- Research, development and testing

SUBSIDIARIES OF
PARTICULAR IMPORTANCE

COMPLEX COMBAT SYSTEMS

Company registered in 2012 to perform production of different artillery systems (mortars, howitzer guns, rocket launchers), hydraulic cylinders, and sporting and hunting ammunition. To this end, BSS founded three business units: in Velika Plana, Kuršumlija and Nikinci.

Production complex in Velika Plana was opened in 2012. The factory deals in the development and production of complex combat systems. It stretches on 20,000 square meters, comprising seven production plants with 220 workers.

SUBSIDIARIES OF
PARTICULAR IMPORTANCE

COMPLEX COMBAT SYSTEMS

Machining plant in Kuršumlija manufactures hulls for combat vehicles "Milos" and "Lazar", various parts for self-propelled gun howitzer "Nora". Standard metal cutting and welding operations by various processes are performed in several different plants: locksmith and welding plant, metal cutting plant, finishing, paint shop and sandblasting workshop, plant for assembly of parts.

The business section of Complex Combat Systems located in Nikinci produces hunting, sporting and shotgun ammunition. It was founded in 1995, and has been working continuously ever since.

MILOSH – Multirole armoured tactical vehicle 4x4

**BELOM SMALL ARMS
AMMUNITION FACTORY**

The Complex Combat Systems company has founded Belom – Small Arms Ammunition Factory in Uzici, Pozega, as its own subsidiary. The company was registered in 2015. The reason for forming this company was to organize in-house production of armaments and ammunition cal. 7.62 x 39 mm, 9 x 19 mm and 12.7 x 108 mm, in order to meet the increased global demand for small arms ammunition on the market.

PARTICULAR IMPORTANCE**

FORGING CENTER

Founded in 2010 by Yugoimport-SDPR and Holding Company Krusik from Valjevo, basic activity of Forging Center is production of parts of defense equipment by hot forging (forgings of projectile bodies and rocket motor chambers for mortar ammunition, artillery and rocket/missile programs), and the forgings for civilian-application products. Its main purpose is to eliminate the "bottleneck" in production of forgings required in the Serbian Defense Industry. Besides the facilities for production of different caliber forgings, Forging Center also possesses a plant for production of plastic elements which started operating in 2015.

PARTICULAR IMPORTANCE**

NEW PRIMER PLANT

To meet the ever growing local demand for Boxer primers required for the production of small arms ammunition and to reduce the Serbian defense industry dependence on imports, Yugoimport-SDPR, Forging Center and HC Krusik joined their efforts in 2014 and started the New Primer Plant project in Valjevo. Two plants were built and three facilities in HC Krusik were refurbished, and Yugoimport-SDPR and Forging Center bought the most advanced equipment for wet processing of Boxer primers dia. 4.5 and 5.5 mm that meets the highest local and global safety and health standards. For environment protection and waste management purposes, the most up-to-date solutions were introduced to neutralize the hazardous by-products. A part of the product range will be supplied to the local defense companies Belom, Uzici and Prvi partizan, Uzice, and a part is intended to be exported worldwide.

PARTICULAR IMPORTANCE**

UTVA – AIRCRAFT INDUSTRY

Pančevo

Utva Factory, founded in 1937, represents one of the first Yugoslav glider and aircraft manufacturers. Yugoimport-SDPR has invested substantial funds in Utva Aircraft Industry since 2017, so its share in UTVA Aircraft Industry is now 99.248%. Presently, Utva Aircraft Industry works on several aeronautical programs. In some of them Utva Aircraft Industry is both the designer and the manufacturer.

All the elements, subassemblies and assemblies are manufactured, and all final aircraft equipping and ground testing of the aircraft and its systems are carried out in the sections of Utva Aircraft Factory. Aircraft assemblies, consisting of several tenths of subassemblies and several hundreds of component parts are made in more than 40 assembly tools.
