

CEREMONIAL EQUIPMENT

Production of unique and high-quality two-dimensional and three-dimensional metal products. Professional experience, modern technology and the quality of products that are 80% handmade.

Products are made in CAD-CAM technology on CNC machines as well as the most modern lasers. Making such models gives a high precision of the final product. After the product is cast, the objects get their final touch. We are specialized for small quantity orders as well as for large scale production.
